Illuminated Rutter semi-automatic or automatic bollard that offers ultimate flexibility in both appearance and functionality. It has been specifically designed for access control to secure buildings entrances such as hotels, golf clubs, exhibition centres and town centres. The semi-automatic bollard can even be upgraded to full automatic control at a later date if required.

The bollard is supplied in a grade S304 stainless steel as standard. S316 grade is available as an option and is recommended for coastal applications.

This bollard is very popular in the domestic market also due to its stylish aesthetics and easy installation. The product was originally engineered to be the 'successfully install it yourself kit form bollard', which has proven to be a very a strong concept.

Available in either black or stainless steel with the optional extra of lighting installed in the top. This bollard is ideal to secure or police access to your property or business.

Operated via a single button key fob this product has a rise and fall time of 5-8 seconds. The kit form bollard comes with an integral pump mechanism, the bollard parts are a basic metal cabinet to house the control board and full tested installation instructions.
